1st page.

This is super perfect. Love the simplicity and the wording as well for the first page

On the left would like the logo and just below, SMITETRADE.

is it possible to change background color for appealing purposes.

Portals : shoppers

Scoring we will use the one I sent the other day. It doesn't confuse the existing credit bureau scoring with ours.

Owner portal:

Please explain POS register

Orders: who ordered, customer or shop to wholesalers.
Loving the inventory part

Contacts on the supplier list should be ours as the intermediary

I see under lending you used our correct scoring. Will explain it to you again.

SS:ID should be created by the system and it should not be an ID number. E.g SS-ID0001 , 0002, 0003

ID number can just show 1st 6 number, then last 3. For privacy . It should also be able to store pictures of borrowers.

Cashier
Under scanner, if the item doesn't have a barcode, will just a picture do?

Clarity; under pos system, its a quick way of recording sales?

Tracking we can use estimation like between 8-6pm as you suggested.

Lender portal

This is where we also put the following disclaimer as well:

Safe Compliance Statement
“Smitetrade provides scoring and risk-assessment insights for decision-support purposes only.
The platform does not provide credit, approve or decline loans, extend goods on credit, or make tenancy decisions.
All lending, goods-on-credit, and rental decisions remain the sole responsibility of the lender, spaza shop owner, or landlord.

Smitetrade does not act as a credit provider, financial adviser, or credit bureau."

Registering new client should have the following like we discussed 1st day we met: picture, phone number, create SSID , but when we scan/punch in the ID should perhaps just reveal the pic and SSID. For safety- credit check tool

Under loans applications are now spazas loaning money for whatever purpose?

Each spaza we should get a notification for approval. When they register a client for loaning it should be able to notify us as we will be charging per head for such. Otherwise when a spaza is not paying their monthly fee it should be able to notify us or the system closes them out with a

grace period of 14 days after sending notifications.

OTHERWISE I AM VERY IMPRESSED WITH THE DEMO. JUST WONDERING HOW YOU WILL MOVE THIS FROM DEMO TO THE ACTUAL THING. IS IT POSSIBLE THAT CERTAIN THINGS OR THE WHOLE THING COULD WORK WITHOUT NETWORK OR INTERNET ESPECIALLY CONSIDERING RURAL PLACES?(JUST ASKING FUTURISTIC)
